pipeline data hazard

veri yönlendirmesi var

if we did pipeline as above, we have load-use data hazards after ld and before add instructions. becaase of add instructions want to acces x2 but ld acces need to access memory first.

ld x1, 0(x31)	G	Ç	Ü	В	Υ							
ld x2, 8(x31)		G	Ç	Ü	В	Υ						
ld x4, 16(x31)			G	Ç	Ü	В	Υ					
add x3, x1, x2				G	Ç	Ü	В	Υ				
sd x3, 24(x31)					G	Ç	Ü	В	Υ			
add x5, x1, x4						G	Ç	Ü	В	Υ		
sd x5, 32(x31)							G	Ç	Ü	В	Υ
